

USE OF SUCCINIC ACID DERIVATIVES IN PRODUCING A
MEDICAMENT INTENDED FOR THE TREATMENT OF INFLAMMATION

SANOFI-SYNTHELABO

Abstract:

A subject-matter of the present invention is
the use of succinic acid derivatives of general formula
(I):

(I)

in which:

A represents a phenyl group optionally substituted by one, two or three substituents chosen from a halogen or a C₁₋₆ alkyl or C₁₋₆ alkoxy group; a thienyl, furyl or pyridyl or a cycloalkyl having from 3 to 8 carbon atoms;

B represents [lacuna] aminobicyclic group which consists of a 5- or 6-membered cyclic amino compound condensed with a 5- or 6-membered cycloalkyl ring which can have one or two unsaturated bonds, with the condition that B is bonded to the carbon atom of the carbonyl group on the nitrogen atom; each R represents

a hydrogen atom or the R residues are combined together to form a chemical bond; R_1 represents a hydrogen atom, a C_{1-6} alkyl group or an aralkyl group having from 7 to 10 carbon atoms; when there are geometrical isomers, each geometrical isomer, its E isomers and its Z isomers, its cis isomers and its trans isomers, in the treatment of inflammation.
